## Vision TV - TV Tuner Module for Horizon Cards

**The VisionTV application is an easy to use interface for controlling the TV and Video overlay windows displayed on your multi screen SYSTEM. The VisionTV application is supplied as standard with most Horizon graphics cards.**

---

Contrast, saturation and brightness

---

Windows® control aperture

---

TV signal audio output via phono connector or via an on-board 4-pin audio connector, allowing connection to a sound card

---

Chroma-keying for overlaying graphics onto video and video onto graphics

---

Horizontal and vertical interpolation for improved picture quality

---

Connection to graphics card via 20 way-ribbon cable

---

Support for different worldwide broadcast standards

---

Support for two Vision TV tuners / System

---
